TINGLE'S

SMALL FRUIT CATALOG

LEAMON G. TINGLE.
PITTSVILLE, MD.

A Word of Thanks

IT IS with pleasure I again send you my catalog and I certainly appreciate the way you treated me the past season, you did better than I even expected and I sincerely thank you for your orders and also for the good words you spoke to your friends about me. I received more orders through your recommending me to your friends than I ever did before and by this as well as your letters telling me so I know my stock pleased you. I want to make you a satisfied customer and if I do not I want you to tell me so. I not only want your order this year but I want it in the years to come, and I shall endeavor to so treat you that when you get ready to place your order you will send it to me.

We have had an ideal growing season and my plants are the best I have ever grown and I believe they are as good as anyone can grow.

I want your order this season and I am sure if you could see my fields of plants and then compare my prices with others that you would unhesitatingly place it with me.

Again thanking you for your favors, and wishing you abundant success this year, I remain. Respectfully yours,

LEAMON G. TINGLE.

Advice to Customers

TERMS. Payment invariably, cash in advance. Remit by Money Order, Registered Letter or Draft.

HOW TO ORDER. Send me your order as soon as convenient, then I will reserve the plants for you and ship when wanted. Be sure to write your name and address plainly, and state how goods are to be shipped; whether by Parcels Post, Express or Freight and state plainly to what point you want them sent.

AT PURCHASER'S RISK. All stock shipped by freight will be at purchaser's risk. All plants shipped after May 1 will be packed and shipped in the best manner possible, but at purchaser's risk.

PACKING. I make no charge for packing and delivering to station at prices in this catalog.

SHIPPING SEASON. I begin filling orders about October 1st, sometimes a little earlier, and continue digging and shipping during the entire fall, winter and spring until May 1st. We are sometimes delayed in January and February and early part of March by freezing weather, but usually able to ship at times during these months.

TRUE TO NAME. We use every care to have plants true to name and we will not be responsible for any sum greater than the original cost of stock should any prove not true to name.

CLAIMS. If any, must be made on receipt of goods, and if just, will be made satisfactory. I send out only good stock in good condition, carefully packed in all cases, but success or failure depends in so large a degree upon the care and management after received, that I do not, because I cannot, undertake to guarantee stock to live.

SUBSTITUTION. Late in the season we usually run short of some varieties listed herein; therefore, when you order late, please state on order sheet if you do not want me to substitute should I be sold out of the variety you order. If we substitute will give you a variety as near like the variety you ordered as possible.

INSPECTION. A Certificate of Inspection from our State Entomologist and State Pathologist will be attached to each and every shipment of stock.

Telegraph or Telephone me at Pittsville, Md.

Special Prices. We quote very attractive prices on large orders. Send us your want list for quotations.

When you receive two catalogs, please hand one to your neighbor.

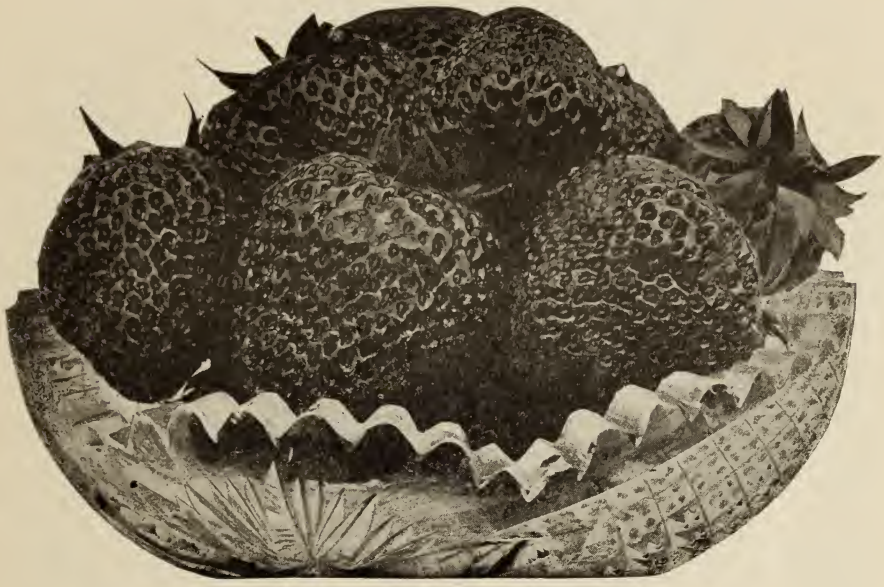
Strawberry Plants



AROMA—One of the Best Late Varieties

Abington A strong, vigorous variety with perfect blossoms. Berries firm, large and attractive. Will give good results for shipping and home use.

Amanda One of the very best large-fruiting varieties grown; the plants are vigorous, healthy, large and upright in growth; blossoms are perfect. Growers wishing an extra-large, good-quality berry should plant some Amanda. It is also a very heavy fruiter and a berry that should bring top prices on any market which appreciates large, fancy fruit.

Aroma One of the best late varieties. Plants are large, very vigorous and healthy; fruit large to very large, roundish of a bright glossy red, of excellent quality and one of the most productive late varieties. Can always be depended on to bear a good crop of fine berries.

August Luther A berry of very pleasing appearance, being of a very bright red color and almost always of perfect shape, a slender, rather sharp pointed berry. It ripens evenly, no green tips, and will ripen its full crop in a very short space of time, making it a good market berry.

Brandywine This is pronounced by one of the largest strawberry growers in the South to be the great middle-crop all-purpose berry. It succeeds on all soils, and withstands adverse conditions of weather remarkably well. The plant is of vigorous growth, a profuse bloomer, producing berries of large size and of a brilliant and handsome color. It is a good shipper and a fine-flavored berry, equally well adapted for shipping, the home market or private garden.

Barrymore A superb variety. The bluntly conical berries are of great size, beautiful to look upon, firm and meaty and are of surpassing quality—rich and sugary. The color is rich dark crimson, which it holds unchanged after picked, with glossy surface, the flesh is deep red. Valued alike for the home garden and for market growing. Mid-season to late.

Bayside The plants are of Gandy type but much larger, with tall, broad healthy foliage ,are deep-rooted and good growers on any soil. The blossoms are perfect and the fruit is produced in clusters on large, strong fruit stalks. The fruit is large, of even size and shape, roundish conical, dark, glossy red, of good quality and very productive. Has given general satisfaction.

Bederwood A good early variety for home use or market. It is a splendid grower, making a large number of strong runners. It has a perfect blossom and immensely prolific. Fruit of good size, light red, medium firm, and good quality.

Bubach Has for many years been one of the best known and favorite berries in the large markets and holds its own against many new comers. No mistake is made in planting it extensively. It is prolific, of good appearance and of excellent quality; a grand old variety that always proves satisfactory.

Chesapeake Undoubtedly the most popular berry in America. It is one of the finest flavored berries, and if quality is considered, you will make no mistake in planting largely of the Chesapeake. Quality however, is but one of its good traits. The color is a dark red resembling the Marshall. It begins ripening a few days ahead of the Gandy and continues to bear abundantly as long as this variety, yielding, in many cases as much again as this old time favorite. It makes just enough plants to give the best results in fruiting, the plants are immense with good strong fruit buds. The leaves are large, almost round, and protect the bloom and fruit from frost and weather. Fruit uniformly large, averaging larger than the Gandy, and as compared with that popular old variety it is more productive, finer, of better quality and without green tips. When crated ready for shipment it presents a very striking appearance, always bringing a fancy price. Its immense size makes it easy to pick, the fruit being borne on long stems, the greater portion of which stand upright, holding the fruit off the ground, thereby making them easy to pick. My Chesapeake this season, are as nice as can be grown. I have reduced my price on this variety this season. Plant heavily of it.

Chipman The plant is of strong upright growth with large healthy foliage. The glossy red fruit is medium in size, very prolific and an ideal variety for home consumption or local market.

Collins A seedling of the Bederwood, but is of much stronger growth, making a good row, but is not the excessive runner that Bederwood is; the foliage stands up very strong and rank, of rich dark green color, and is free from rust or disease. The fruit is quite different from Bederwood, which is light colored, and not of the richest quality, while Collins is of a dark red color from surface to center, and of rich flavor, ripening evenly without green tips. The texture is something of the Bederwood type and ripe berries will remain on the vines several days without souring. Mid-season to very late.

Charles I Mr. Baldwin, the introducer says: "For years we have been looking for a good extra early strawberry, and in Charles 1st, we have found just the strawberry that we have wanted. It ripens nearly a week before Michel's Early and is very productive, yielding more quarts of large berries than any other early variety. It is a strong fertilizer and a strong grower. Berries are large, regular in form and of good color and quality."

Climax Of a large size and uniform shape, splendid bright color with good flavor. Plants very strong and hardy, foliage a beautiful light green. Very productive and a profitable one to grow.

BRANDYWINE—A Very Attractive Berry

Corsican C. A. Green of Rochester, N. Y., says this is the biggest berry on earth, and also his favorite. Here are his reasons: "First, it is the biggest berry; second , it is the brightest and best in color; third, it is a great yielder and prolucer; fourth, and most important of all the foliage is exceedingly vigorous and leathery, resisting fungus, drought and even neglect of cultivation."

Clyde As large as Bubach and about a week earlier and very firm. Plant is vigorous and healthy. Well-known standard market variety.

Crescent This is one of the old standbys and is a good one and very dear to the hearts of a good many strawberry growers. A sure bearer, very productive and of splendid quality.

Champion K. I secured my plants of the introducer last spring. He says "This variety has a clean, dark-green foliage, no leaf spot and a fine plant maker. The berry is a bright red, round, very large and easy to pick, ripens a little ahead of the Klondyke. As to production we don't believe it can be beat. In 1913 we gathered an average of 8,640 quarts to the acre. We advise you to try at least a thousand of these plants, you will never regret it, and when you once see the fruit you will want more plants. A cross between the Champion and Klondyke."

Duncan Ripens between Parsons' Beauty and Gandy resembling the Gandy in both fruit and foliage. Berries large and a good shipper.

Dr. Burrill In the Dr. Burrill we have a midseason variety bound to be a money-maker for strawberry growers. It is a scientific cross of Senator Dunlap and Crescent, and all of the splendid qualities of these two famous and popular strawberries are embodied in this one great variety. In plant growth Dr. Burrill is a marvel. Its long and heavy root system makes it a perfect drought resister. Its foliage is large and of a beautiful dark green. In production of fruit Dr. Burrill surpasses either of its parents. The berries are large and beautifully formed. The surface of the berry is a deep glossy red. The meat is solid and rich. As a canner it surpasses Warfield, which up to the present time has held the leading place as a canning berry. In flavor it is milder and more delicious than Senator Dunlap. The berries are excellent shippers and splendid keepers. The calyx is a bright green, and the seeds are yellow, making a beautiful color combination. An ideal berry for either home use or for the market.

Dornan or Uncle Jim A western strawberry that is attracting much attention for its superior merits. Plants unusually robust with large healthy foliage. It is a remarkable drought resister and a big and reliable producer of extra large berries—very uniformly heart shaped —of a bright red color and of high quality. It is claimed by the introducer that the fruit brings 25 per cent more in the Chicago market than any other variety, on account of the large size, handsome appearance and fine quality of the berries, 12 selected berries often filling a quart measure heaping full.

Doris Claimed to be the most profitable strawberry for market ever grown, having most of all the desirable qualities of a late market or home use berry. I find it very similar to Mascot.

Edmund Wilson A unique variety. On good soil the plants attain a height of twelve to fifteen inches with a spread of fully a foot, and are enormously prolific. The berries are very large, globular or bluntly heart shape, of deep maroon color with smooth surface and quite firm. Perhaps the richest in sugary lusciousness of all. Ripens in midseason.

Ettersburg No. 80. Very productive of fine, red berries that are of large size and have a large clean cut green calyx or hull. The blossoms are very large and the runners very strong. The plant is extra vigorous and deep rooting and the foliage leathery. In the fall of the year the foliage is of a bluish cast. The fresh fruit is of fine dessert quality, and for flavor as a canned berry it is the very best, a deliciousness found in no other variety. It is red and red to the center, and will not break up in processing.

Ettersburg No. 112. A very large berry having a deep glossy appearance, and borne in very large trusses. It has a peculiar high quality in flavor that is found only among hybrids of Chiloensis blood. A good dessert berry.

Early Jersey Giant (Per.) Ripens with the very earliest. Berries very large, brilliant scarlet-crimson, conical with pointed tip, colors all over at once, has delightful and rich mild wild Strawberry flavor. Large light green calyx or "cap" hence exceedingly showy and attractive. Blossoms large, perfect, rather late, thereby missing the late frosts. Plant is a strong grower with large leaves on long pliant stems and a heavy yielder.

Early Ozark Very productive, will outyield most of the early varieties, berries are large, and bring top prices. They ripen about three days later than Excelsior, and a day or two earlier than Klondyke. Plants are strong rooted, large and of good dark green foliage.

Excelsior An old variety which leads them all for earliness. They ripen from three to four days ahead of the leading early varieties. Makes plants freely, berry is of dark red color, of good size for such an early berry, and will ship well, being very firm; a great yielder and considered the sourest of them all.

Early Market Strong grower, berries larger than Excelsior and more productive. If given half a chance will take care of itself and give good results. Berries are good shippers.

Ewell's Early A very early berry, dark red, of good quality, good shipper and very productive; rank foliage. If you are after an early berry, try this one.

Fendall A large berry of fine flavor, very beautiful, rich in color, smooth and glossy, with long stems and large caps. A strong growing plant, with healthy light green foliage. The plants and fruit will command attention wherever seen. Be sure and include the Fendall in your list, if you want large fancy berries and lots of them. Mid-season to very late.

First Quality The plants are very large, strong upright growers with healthy dark green foliage. In productiveness it ranks with Sample and other well known varieties and the fruit is of the largest size, uniform in shape, colors well, firm enough for a commercial variety and of good quality.

Gandy One of the universal favorites and as a "money-maker" hard to beat. A good grower with tall, healthy foliage and produces large, dark crimson berries, that when fully ripe, are of excellent quality. It is a splendid and always brings fancy prices. A free plant maker and a good grower while its extra firmness makes it keep on the vines longer than almost any I know. Late.

Glen Mary One of the most reliable heavy croppers and a splendid grower of large stocky plants. Fruit large, dark red, sometimes a little rough and uneven, but not misshapen. A valuable variety for all soils and all seasons. A long season fruiter.

Gold Dollar Produces a heavy crop of large-sized, highly colored berries that are perfect in shape. It has perfect blossoms, every one of which matures a good berry. Ripens medium early.

Gibson A vigorous grower with ample foliage and long roots, which enable it to yield abundantly even in times of drouth. The fruit is large, red to the center, with a fresh, green calyx, nearly round, and very firm, making it a good shipper. It is good for canning, or for the table.

Hammer Mr. Baldwin of Michigan, of whom I purchased my plants, introduced this two years ago. After fruiting it I find it the same as Chesapeake.

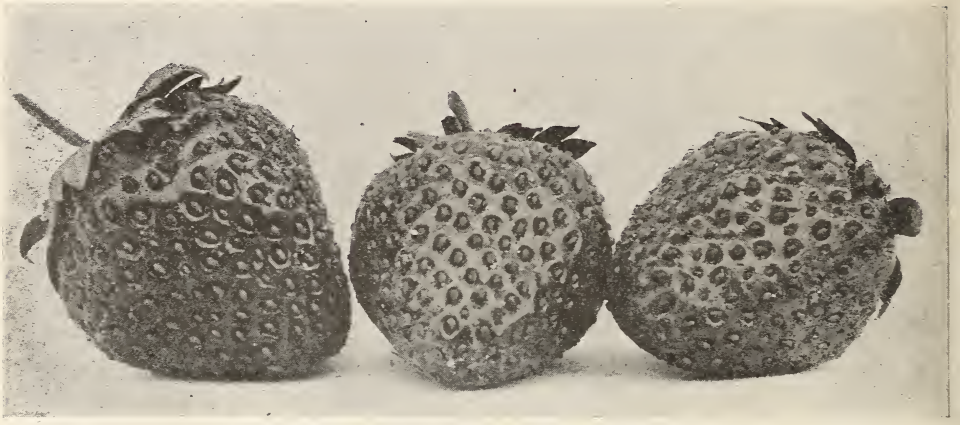
Haverland An old standard variety which seems to do well everywhere. It never rusts or shows any blight. Has an imperfect blossom but easy to fertilize; a good plant maker; enormously productive of long, conical and even shape berries. If in doubt, plant Haverland.

Heritage (Per.) A long season variety—from quite early until quite late. The berries are large, many of them very large, and the yield is heavy. The quality is fair and the texture firm, but unfortunately many of the berries are ridged and seamed and the color is not very bright; hence, it does not present an attractive appearance. However, the plants are vigorous and healthy, and yield so bountifully, it has much value.

Helen Davis Noted for its productiveness and very long fruiting season; yields enormous crops of very large berries, many of them average as large as medium sized hen eggs; foliage tall and green; a good plant maker.

Hustler A native of Pennsylvania and a beauty. On one occasion, three quarts of different varieties, all of which were very large and fancy, were taken to the Reading Terminal Market in Philadelphia, and the different dealers were asked which they preferred. Out of about fifteen all but one immediately selected Hustler. The plants are strong and vigorous, without a blemish on the luxuriant foliage. The berry is of large size, high quality and of a beautiful, rich scarlet color. A good shipper and its fine quality and high color will command the highest price on any market.

Hundred Dollar (Per.) A very valuable and mid-season variety. The introducer claims that "there is not another variety of Strawberry that will outyield this giant or surpass it in quality" has to a large degree been fulfilled. The plant is a strong vigorous grower, and among the most prolific. The berries average very large indeed, the color is bright scarlet and the quality mild, sweet and luscious. It is not very firm—not firm enough for long shipment. There are indeed few varieties more valuable for nearby markets or for the home garden.



JOE JOHNSON—One of the Best Berries Grown

Joe Johnson (Big Joe) If you want a "Money-Maker" plant this variety. The more I see of it the better I like it and this seems to be the verdict of everyone. Pittsville is one of the largest strawberry shipping stations in the country and the Joe Johnson brought the highest price of any berry on our market. It ripens just a little before the Chesapeake, just when the berry buyers are wanting something fancy, and that is what they get when they buy the Joe Johnson. It is a beautiful red berry with a bright green calyx or cap, which adds much to its beauty and market value. Flavor is of the best, a perfect table and canning strawberry, and a superior shipper. It seems almost impossible for a bed of plants to produce such a quantity of extra large, perfect shaped berries as the Joe Johnson will do. It thrives in soils of every class that will grow strawberries of any kind. If you have not already tried this wonderful variety I want you to do so this season. The demand for plants is going to be great; I have already booked some large orders for them.

James E. A good, large-fruiting berry, medium early. Bears an enormous crop of large, attractive berries of fine quality. I am much pleased with it.

Jopp's Favorite A new variety introduced last year. The berries are very large and fancy of good quality, color bright glossy red, red to the center and very firm. The plants large with tall, broad, bright green waxy foliage without a spot of disease. Brings top prices on the market.

Jessie Jessie ranks among the leaders with growers who want fancy strawberries and whose soil is adapted to its production. Under right conditions it is one of the most satisfactory varieties produced by commercial growers. It is an extra heavy yielder of highest quality fruit and a good pollenizer.

Jerome Growing rapidly in favor here in the east, also becoming universally popular in the Rocky Mountain regions. The berries of this variety are bright red, rich in flavor, and are splendid shippers. Jerome is also a strong pollenizer of pistillate varieties, and these numerous and important qualities promise to make it quite generally grown in these sections.

KELLOGG'S PRIZE—A Very Prolific Fancy Berry

Kellogg's Prize A pistillate variety with a very long fruiting season. It thrives in soils of every class, and yields immense quantities of large, perfectly formed berries, highly colored from center to circumference, its golden seeds lending a gloss to the surface of surpassing brilliancy and beauty. There is no other berry having a flavor of greater delicacy. Foliage large and healthy; calyx large and green. One of the heaviest fruiters I have ever grown, and I recommmend them to you for trial.

Kellogg's Premier Introduced by the R. M. Kellogg Company in 1915 and after fruiting it I am convinced that it will be a very popular berry. One grower, who having seen it in fruit wanted to purchase 40,000 plants to set for fruit. I am giving a part of the introducer's description. "Kellogg's Premier is distinctly in a class by itself. In productiveness it is a wonder. The berries are mammoth in size, beautifully formed, bright, rich red through and through, delicious in flavor; and a splendid shipper. In one word, every berry is a show-berry and a prize-winner. It is the money-making king of all early berries. Last year the Premier began ripening berries fully a week earlier than any other variety, and continued to fruit heavily for more than four weeks. And the last picking was as good as the first. Another quality in which the Premier excels is that of a pollenizer for pistillate varieties, a characteristic of unusual value because of its long blooming season. If you believe you have already seen the greatest early berry, but have as yet never seen Kellogg's Premier, you still have something worth while to discover in the strawberry world. And if you would grow strawberries that will sell at your own price, no matter how many other berries are on the market, the Premier is the variety for you to choose."

Klondyke This berry is a money maker. Berries uniform in shape and size, dark red, mild and delicious, very handsome. Plants make a remarkable growth, are tall and compact, stalks strong, leaves light green, makes abundant runners and an unusual number of crowns. One of the very best paying early varieties, and is such a good shipper that its appearance in the market causes it to be eagerly bought by those who are ready to pay good prices for fancy fruit. Plant Klondyke for more trade and more profits.

Longfellow The season of this great variety is early to late, and few varieties excel in the amount of fruit produced. The fruit is long and of a perfect strawberry type. In color it is a dark red, and this color extends from circumference to center. In flavor it is rich, mild and sweet. It is a profuse bloomer and every bloom is perfect, making it an ideal pollenizer of pistillates of the early and mid-season sorts.

Late Jersey Giant (Per.) Introducer says: "The latest of all strawberries and best late variety. It undoubtedly has blood of the Gandy in it, but superior in quality; the berries larger, more brilliant color and produced in greater numbers; uniform large heart shape, smooth and glossy, firm and meaty. I regard it as the most beautiful strawberry I have ever seen."

Lea Makes a strong, sturdy growth without a sign of disease, has perfect blossoms; texture firm, season early, very productive, ripening evenly all over at once without green tips and is uniformly medium large. The originator says it will stand more rainy weather and keep in better condition than any berry grown.

Lady Thompson Berries medium in size, and very rich flavor. It is extensively grown throughout the South and is also becoming very popular in the North. Very productive, a thrifty grower, and a great drought register.

Lovett Well known standard market variety. Fruit large, bright red; firm and of good quality. A good grower, productive and reliable.

Lady Corneille This is my third year growing this variety and it gets better each season. It begins to ripen about with Klondyke and the berries are almost twice as large as Klondyke. Last season we left some of the berries on the vines to see how long they would keep, they kept on the vines over a week after getting ripe and then instead of rotting they just simply dried up, it is a wonderful keeper and I do not see how there could be a better shipper. The berries are supported on heavy, stocky fruit stems and everyone matures into a perfect berry. The blooms are rich in pollen, calyx large and heavy and remains green, giving a beautiful appearance to the fruit. Berries large, rich, glossy, red, slightly long, with bright golden seeds which add to their beauty. Has the true strawberry flavor, rich, sweet and delicious. The Lady Corneille has the size, color, shape, appearance, productiveness which goes to make a successful berry. You cannot afford not to try it.

La Bon Mr. Schild, the introducer, says "This variety is extremely hardy and drouth-resisting, retaining its fresh and upright growth when other sorts droop and drop in extremely dry, hot weather. A strong, healthy grower and productive of large fine fruit with a firm skin making it a good shipper and its quality is good, fruiting mid-season. A variety that cannot fail to interest you."

Mascot A fine large late variety that is giving satisfaction in all sections and is bound to become popular. The plants are large and healthy, making splendid beds on nearly all soils. The foliage is a dark glossy green, free from rust. The fruit is fully as large as Gandy, glossy red and of fine quality. It begins to ripen a few days earlier than Gandy and continues in bearing until all the late varieties are gone. Does especially well in Pennsylvania and West Virginia.

Marshall (Per.) Too well known to need any extended description. This is a berry that has been so popular in the New England market for years, where the grocers are always delighted to get it on account of its rich, dark red color, that it is bound to attract and please customers. It is one of the richest flavored strawberries grown. It is a strictly fancy berry. Mid-season.

LADY CORNEILLE—An Extra Fancy Early Berry

Myers No. 1 The berries ripen about three days before Gandy. It will bear extra large crops, let the weather be wet or dry. Succeeds on all soils; fruit medium size and firm. A favorite for long distance shipping.

Missionary A variety that is proving very popular all through the South. It is a strong grower, making plants freely; early to mature, coming in right after Excelsior, and very productive. The berries are well colored, firm, large, and hold their size well throughout the season. It is a good shipper, having a tough skin not easily broken by handling.

Michael's Early An old favorite. For eating from the vines after itis full ripe there is probably nothing better. Those who have a garden or a good local market for an extra early berry will find the Michel's just what they want.

Magic Gem A midseason-to-late variety originated by Edward Vance of Idaho. Because of the unusually large size and high quality of the berries and its long fruiting season, Mr. Vance has controlled the strawberry trade in his local market. The berries are not only large and abundant, but they also are beautifully formed and are distinctly cone-shaped. The berries are highly colored, being dark red with a glossy surface, and bright yellow seeds which are imbedded in the surface just deep enough to produce a bautiful contrast. The flavor of the fruit is mild and delicious. The calyx is a dark, rich green, which adds to the beauty of the berry. The berries are very firm and ship exceedingly well.

Monroe A seedling of the Sample and much like Wm. Belt in flavor and color, but firmer and more uniform in shape. The blossoms are perfect and they continue to bloom through a long season. Makes plenty of runners.

Myrtle The originator says: "Largest extra early berry by far that I have ever seen; very firm, a perfect bloomer with large blossoms full of pollen, double cap, a great plant maker, rank foliage and a dark red berry.

Matthews This new berry is attracting much attention. Originated by a Mr. Matthews of Maryland, who thoroughly tested it out before placing it on the market. I have never fruited it but understand it to be an extra fancy early variety with blossoms so strong that frosts do not injure it. He says it is immensely productive, large size, beautiful red color with a large, green cap. The plants have made a very nice growth with me and I suggest that you give it a trial.

Morse The berries are large size, dark red all through and have fine flavor. Foliage heavy, large and spreading which protects the blooms from frosts. They are sure, heavy croppers, keep up their size throughout the season, and command the highest prices.

MESSENGER

A new early berry which I am now introducing for the first time. The fruit begins ripening with the early varieties and continues for a long season. The berry is of extra large size, well colored, and very firm, making it a good shipper, excellent flavor, a good market or home table berry. The plants are exceedingly vigorous—the strongest of any early berry I ever saw. The foliage is clean and healthy, almost, if not quite as rank as the Chesapeake, which it resembles very much. I believe this berry will prove a money-maker to those who plant it and I advise you to secure enough of the plants to give it a thorough test.

Mixed Plants It often happens that in taking up a large quantity of plants to fill hundreds of orders that sometimes we will get up more of some variety than are needed at that time to fill orders. It also sometimes happens that we will have a row or two in the field that will get mixed, which we cannot use for filling straight orders. To those who are willing to set this kind of plants, knowing that they have some of the listed varieties, but not knowing which they are or which they are getting, we are willing to make a very low price.

McAlpine The berries are a beautiful scarlet in color, very large and very fine in quality. Does up well in the package and brings the top of the market. Under date of June 9, 1913, W. O. & H. W. Davis, commission merchants of New York City, wrote: "We had three shipments of the McAlpine Strawberries this morning, and sold them for 23cts. a quart wholesale. We think this the finest berry that we have seen for a good many years, and the trade is carried away with it. This is the fourth season this berry has been fruited, and we think it far superior to any berry we have ever sold; it is large in size, a heavy yielder and holds up in size until the very last picking." The McAlpine is certainly a heavy fruiter and I never saw more perfect berries, large and every one as near alike as it is possible for a berry to be.

New York This is the strawberry that was awarded a prize of $100 which was offered for the best and largest variety. The plant is an unusually robust grower, making but few runners, throwing its strength and vigor into the magnificent berries, which are produced in great abundance and are of immense size. In form they are very handsome and regular, of a roundish conical shape. Color a crimson-scarlet dark, rich and inviting, coloring all over and leaving no green tips. The flavor is deliciously rich and melting. For a family strawberry it is one of the best, but its large size and delicate texture would possibly prevent the berries from arriving in good condition in distant markets. This berry is so popular it has been introduced under many different names. You will make no mistake in planting this variety for home use or local market.

McKinley (Per.) Unrivalled as a strawberry of high quality. Berries large, handsome and freely produced on strong growing, healthy plants. Ripens in mid-season and is too tender in texture to endure shipment. It is pre-eminently a variety for the home garden.

Nick Ohmer A perfect giant among strawberries, roundish-conical in form, uniform and regular; rich glossy crimson, firm and solid, excellent in quality and average large to the very last picking. The plant is exceedingly vigorous with clean, healthy foliage without the slightest tendency to rust. Last season I thought I would surely have enough plants of this variety to supply my trade but after I had nearly sold out I had an inquiry for 500,000 from one party. I have an exceptionally nice stock this season and will be glad to have your order.

Norwood Introduced in 1908 at $10 per dozen and every year since the demand has been greater than the supply! Norwood is similar to Marshall in many ways but is a better grower and more productive and reliable. The fruit is large and handsome, regular in form and equally as fine in flavor as Marshall. The season of ripening is the same as Marshall, mid-season.

New Oregon Extra large, firm and of fine form, a brilliant, rich red having a glossy varnished appearance. When full ripe has a distinctive flavor suggestive of the wild strawberry, is crisp and delicious, and will remain on the vine several days without injury, keeping perfectly for many days after picking; stands handling and long distance shipping and will hold its color, shape and flavor when canned. Is dark blood red to the very center and no matter how large it gets it is never hollow. It is a healthy vigorous grower with luxuriant foliage. The above is a part of the introducer's description. I received my plants from California last season and have not yet fruited it. The plants have made a nice growth with me.

Ohio Boy The plants are vigorous, very productive, fruit large, dark red and a good shipper. It begins to ripen with the late mid-season varieties and continues in bearing until the late varieties are gone.

Orem Begins to ripen with Gandy and bears an abundance of berries after Gandy is gone, and about three times as many. The berries are exceedingly large and smooth light red with yellow seeds and dark green caps, which make them very attractive.

Pride of Somerset Introducer says: "It is as early as Excelsior, good plant maker of large, healthy, deep rooted plants. Very productive of large berries. A great feature about this wonderful variety is that there are very few small berries as every blossom matures a large berry, nearly all one size. Color a beautiful red all through, ripens all over at once, no green tips; shape medium long and round; blossom perfect and rich in pollen; cap very large and green which shows off the berry nicely; very firm, good shipper. The flavor is unexcelled, extra good for a family berry. Has never shown any sign of rust or disease; foliage very heavy, tall and thick."

Pocomoke This variety was found where there had been some Wilson and Sharpless strawberries dumped, and is supposed to be a seedling of the old Wilson crossed by the Sharpless. The berry is round and resembles the Wilson, but is much larger. One of the best varieties in existence, not only for its enormous productiveness, but on account of its beauty, adaptability to all soils, its foliage enduring the dry, hot weather, its large size, its deep color, its firmness and high flavor. The plant is a strong, robust grower, with deep roots and lots of them, perfect blossoms, and is an enormous yielder of large red berries. It ripens evenly, and is one of the best shippers yet introduced. This variety is a good one, and is grown as one of the leading market berries. Try a few thousand. You will not be sorry. We guarantee it to please you.

Pride of Cumberland Compared with the Gandy, it is a week or more earlier in ripening, of the same large size and regular shape with large cap and deep red color, which makes it very showy in appearance, and is unexcelled for shipping. The blossom is perfect; the plant vigorous, free from rust and remarkably productive. Pride of Cumberland is the plant for business. Most all the fruit is held off the ground by strong bearing stems.

Parsons' Beauty One that may be depended upon to produce a large crop of fruit every season. The plants are splendid growers on any soil and without a sign of disease. The fruit is large, conical, uniform shape, dark red and fair quality. Largely planted by commercial growers on account of its vigor and productiveness.

PITTSVILLE

A new mid-season variety beginning to ripen about the same time as Senator Dunlap which it resembles in some respects but is not as dark a color and is very firm, making it a good shipper. Will stay firm a long time after being picked. Has a beautiful, double, green cap. Holds its large size from first ripening until the last picking. The plant it large and healthy; very deep rooted, making it a good one to plant in dry soils. It also differs from the Senator Dunlap in size of plant as the Senator Dunlap is one of the smallest plants I grow.

Paul Jones This is one of the best varieties ever introduced. It always produces a large crop of the finest fruit on any soil and in any weather. The fruit is of the larger size and holds its size to the very last, is of even size and shape and of the finest flavor, a splendid keeper and a variety you will make no mistake in planting. Very popular with large commercial growers.

Pride of Delaware This is described by the originator as "large, firm and evenly colored, nearly uniform in shape and size; the foliage very bluff and stalky, holding the fruit up from the ground. It has large green caps, closely resembles the Gandy and ripens two or three days earlier than the Gandy and, on high soil where it originated, it is three times as productive."

Pride of Michigan From Mr. Baldwin of Michigan. The berries are large, rather oblong, very bright red, glossy and beautiful. It being very firm makes it an excellent shipping berry. The plant is vigorous and healthy, making a good fruiting row in any kind of a season. This is not the same as New York.

Pennell This variety is a most vigorous grower and a sure cropper , and the fruit is large and fine when the plants are not allowed to set to thick in the rows. The berries fresh from the vines possess the finest, richest flavor possible to imagine. A variety for the home garden, for yourself and friends.

Rewastico Mr. Allen, the introducer, says, "The color is a rich, deep, cardinal red, which penetrates the berry through and through. In productiveness it is all that could be desired; in size it is uniformly large; in shape as perfect as if turned out of a mold; in plant growth it is healthy and vigorous; in quality it is rich, with aromatic strawberry flavor, though somewhat tart, but is firm enough to be very popular as a market berry. I consider it the only real competitor the Chesapeake has ever had and in some respects it even surpasses that popular variety."

Send me the names of your friends so I can send them a copy of this catalog.

Robbins' Prolific Introduced by introducer of the Sample who says it is better and more prolific than that popular variety. He describes it as follows: "It is a very strong vigorous plant with long roots. Makes plenty of plants and needs plenty of room to grow. Every berry of fine shape and as perfect as if run in a mould. A sweet beryr; a firm good market berry. An early berry, and holds out late also a fine berry to plant on dry land."

Ryckman Its great size and productiveness, thrifty growth and delicious flavor makes it one of the most valuable berries ever grown for business purposes. Many extensive growers say that it produces even larger crops the second year than it does the first. It is also noted as an extremely valuable variety for poor soils and for fruiting continuously on the same ground for several years . It ripens in mid-season and is a perfect flowered variety. You will make no mistake in planting this variety.

Superior A great market variety for the commercial grower. Not excelled by any for shipping and keeping as it is one of the firmest berries I ever saw. The plants are vigorous and healthy and succedd on any soil. It is a great plant maker and should be planted a good distance apart. It sets an immense amount of fruit and if planted on rich soil, or is well fertilized it will not be surpassed by any variety in productiveness. The fruit is medium to large, bright glossy red and of good quality.

Sample One of the very best strawberries and a money making late variety. Sample produces a very heavy crop of nice, showy berries of large size and fine quality, continues a long time in fruit the berries being large to the last. It will yield as many berries as Haverland and will average as large as Bubach. Colors all over at once—fruit perfect, foliage perfect. You will like Sample and they will make big money for you.

Stevens' Late Champion A descendent of the Gandy. It ripens late, and is similar to the Gandy in many respects; except that it yields nearly twice as many quarts of berries upon a given space and the berries are not so uniform in size and shape nor so handsome. One of the most prolific and profitable of the late varieties for market growing and a valuable sort for the home garden.

Success One of the finest early varieties for the home garden. Berries round or slightly elongated, bright scarlet or flame color, quite large and very uniform in size, color and shape. Plants are vigorous, healthy and most prolific. Though the berries are not firm enough to endure long shipment, it is one of the most profitable strawberries for local market and very desirable for the home garden.

Staples In some of its characteristics the Staples resembles the old and popular Warfield, but has the added advantage of being a perfect flowered variety. It is of perfect-strawberry form, ranging from rich crimson to deep wine in color. Staples has what we may call the true strawberry flavor and is deliciously tart.

Senator Dunlap The Dunlap is a variety that beginners who know practically nothing about strawberries can succeed with. The foliage is tall, upright with a long leaf, and has more than the ordinary power of developing a heavy crown system. It has an extra long flowering season; the bloom is handsome and exceedingly rich in pollen, which makes it very valuable to plant with such pistillate kinds as ripen in its season. Its long roots go down into the sub-soil for moisture, and a severe drouth has less effect on it than most others. The fruit is a dark red, with a glossy finish, shading to a dark scarlet on the under side, with prominent yellow seeds that look like gold embedded in highly colored wax. The meat is bright red all through and

exceedingly juicy. For a medium size, very productive, mid-season berry don't hesitate to plant Dunlap.

Sharpless An old variety but still very popular. Plant vigorous and hardy, very productive. A good one for home use.

St. Louis A good one for home market but too soft for shipment. Plant very large and productive of large berries. One of the earliest varieties to fruit.

Townsend's Late Champion Similar to Aroma.

Twilley Large in size, well-colored and exceedingly firm. The eating quality is excellent. Makes a large vigorous foliage of healthy, rich, light green foliage. One grower says he clears more money per acre from Twilley than from any other variety he grows.

Todd's Late Champion Mr. Todd of Delaware, the introducer says: "It is one of the latest varieties I have ever fruited and will produce as much fruit as any variety I have ever fruited. The plants are extra long, with tall, dark green, healthy foliage; it makes splendid plant-beds on any soil. The blossoms are imperfect and each plant produces several strong fruit-stalks which keep the fruit well off the ground and it is well protected by the tall foliage. The fruit is large, of even size and shape and the color a bright glossy red.

Tennessee Prolific A favorite with many growers in all sections. The plants are good growers in any soil, very productive, fruit large, bright glossy red and of fair quality. Ripens second early. A good one to plant with imperfect sorts.

Three W's Mid-season. Noted for its extra long keeping quolities. Originated in Tennessee; plants are very large and vigorous; with a wonderful root system; very fine for dry localities;; fruit is of large size, good color and an extra strong flavor.

Warren Originated by Mr. S. H. Warren of Mass., the well-known strawberry judge who spent most of his life in growing fancy Strawberries and he claimed this the best he ever grew. The fruit is so large and handsome it is one of the first to sell at a good price, even in a glutted market; it also is an extra berry to stand up after being packed, therefore a good shipper. The plants are good growers, extra large, with thick dark green foliage.

Wm. Belt A king among Strawberries. The plant is vigorous and succeeds upon a great variety of soils, and invariably yields very heavily. It begins to ripen quite early and cantinues almost to the close of the season. It is firm and a good shipper and gives large pickings for a longer period than most varieties. Considered by many to be the best berry grown today.

Wilson One of the oldest strawberries in America, and today is not surpassed by any other variety for productiveness; the fruit is very large and firm;one of the best for market purposes; a great plant maker, which are very strong and will succeed on any variety of soil.

Warfield A well-known standard shipping and canning berry. Plants very vigorous and productive. Fruit large, nearly round, dark, glossy red, firm and of good quality. Warfield and Dunlap make a good, strong team.

Wolverton A good, reliable, standard variety. Will succeed on almost any soil. A good grower and very prolific.

Fall-Bearing Strawberries

All over the country the people are beginning to realize the possibilities of the fall-bearing strawberries and those who were skeptical before seeing them in fruit are very enthusiastic after once seeing them in fruit. They are no longer an experiment; their value has been amply proven and they have come to stay. The "old reliable" Farm Journal in speaking of them says: "Every household that raises its own berries or has room for a berry patch, can and should have some of the fall-bearers."

They are no harder to grow than the "June only" kinds. For full crops in autumn, it is best to remove all blossoms until about the first or middle of July. In all other respects they should be given the same treatment as other varieties of strawberries.

Progressive A wonderful fall-bearing strawberry and considered the best by many growers. The spring-set plants not only produce a big crop of berries the same season, but the runner plants commence to bear fruit as soon as set, and quite often you will find a runner-plant full of blossoms and berries before it has made any roots, and in this way Progressive yields a crop of fruit the first year that is truly wonderful. The fruit of the Progressive is of good size, smooth, of good color and appearance. The plant is a good grower and healthy.

Superb Some growers consider the Superb the best of the fall-bearing sorts, but I find the Progressive the best with me. The Superb is not as good a grower as the Progressive, but is ideal for the hill-system of growing, nor does it produce as many berries but the berries are of large size and very handsome. It resembles the Chesapeake so much that some persons have mistaken it for the Chesapeake. The Superb is not only a good fall-bearing sort but one of the most profitable varieties to plant for a regular season crop.

Americus The plant of the Americus is very healthy and a strong grower; the berry is medium to large in size, firm, uniform shape, bright red through and through. The plant when loaded with berries is a beauty. The berries have the wild strawberry flavor, and I consider it the best flavored of all the fall-bearers to eat right off the vines but for table use I prefer some of the others.

Standpat This would be the best of the Fall-Bearing strawberries if it would only make more plants, the berries are large, and it is one of the most prolific of them all, very fine flavor and firm. For the "hill-system" of growing it is ideal after you once get the plants. I have a few hundred of the plants that I am offering at 10 cents each and will supply you as long as my stock lasts. This seems a very high price but it is the cheapest I can grow them for.

THINK IT OVER

This is an age of advancement. The outlook for the Strawberry grower was never better. The consumers are growing in number far in advance of the producers, the demand for quality food stuffs is greater than the supply. The cities vast population consumes a great quantity of delicacies and what is more delicious than strawberries and cream. These Everbearers help swell your profits.

Why pay big prices to agents when you can get better stock direct from the grower (Tingle) for less money?

It matters not how large or small your order, it will pay you to send it to me. My stock will please you.

PRICE-LIST OF STRAWBERRY PLANTS

These prices are by express, not prepaid. When ordered by Parcel Post add for postage to the different zones (to points within the United States only) as follows. See table of rates and weights on 4th cover page.

TINGLES' VEGETABLE and FLOWERING PLANTS

Why take chances on your crop when you can buy Strong Transplanted Plants, Guaranteed t oreach you in good growing condition.

All the leading varieties are grown. Plants are put up in well ventilated packages and in buying our plants you need take absolutely no chances.

Small orders, 2,000 plants or less usually are sent by Parcel Post. Large orders by Express. We prepay the postage and express charges on all plants.

The following varieties ready March 15th to June 25th:

MAMMOTH PANSIES (in bloom)

Doz. $ .35; 3 Doz., $1.00; 100, $2.75

EARLY BEETS

Early Sure Go - - Early Eclipse

Doz. $ .10; 4 Doz., $ .35; 100, $ .65; 500 $2.00; 1,000, $3.50.

EARLY CABBAGE

Early Jersey Wakefield—Copenhagen Market—Early Summer

Doz., $ .15; 4 Doz., $ .50; 100, $ .90; 500, $3.50; 1,000, $5.50.

EARLY SNOWBALL CAULIFLOWER

Doz., $ .20; 3 Doz., $ .50; 100, $1.00; 500, $3.75; 1,000, $6.75.

BIG BOSTON LETTUCE

Doz., $ .10; 4 Doz., $ .35; 100, $ .65; 500, $2.00; 1,000, $3.50.

TOMATO

Sparks Earliana, Bonnie Best, Chalk's Early Jewel
Hilborn's Globe, Liv. Stone, Matchless
Early 4th of July, Dwarf Stone, Ponderosa

Doz., $ .15; 4 Doz., $ .50; 100, $ .90; 500, $3.50; 1,000, $5.50.

TINGLES' FAVORITE PLANT COLLECTION

A complete family garden, 12 dozen plants, (actual value $1.50) Parcel Post, for only $1.00.

3 Doz. Early Beets
2 Doz. Early Cabbage
1 Doz. Early Cauliflower
2 Doz. Early Celery
2 Doz. Big. Boston Lettuce
1 Doz. Early Tomato
1 Doz. Main Crop Tomato

This collection consists of the best varieties, and is arranged to give you a nice succession of fresh vegetables throughout the entire summer. Much valuable time is saved when a large number of orders can be put up exactly alike. In buying this collection YOU RECEIVE THE BENEFIT OF THIS SAVING.

The following ready May 1st:

EGG PLANTS

N. Y. Spineless - - Black Beauty

Doz., $ .25; 3 Doz., $ .65; 100, $1.50; 500, $4.75; 1,000, $8.75.

PEPPERS

Ruby King - - Chinese Giant

Doz., $ .20; 3 Doz., $ .50; 100, $1.00; 500, $3.75; 1,000, $6.75.

EARLY CELERY

White Plume - - Golden Self Bleaching

Doz., $ .10; 4 Doz., $ .35; 100, $ .65; 500, $2.75; 1,000, $4.50.

YELLOW NANSEMOND SWEET POTATO

Doz., $ .10; 100, $ .45; 500, $1.75; 1,000, $2.90.

FANCY LARGE LEAVED COLEUS

6 for $ .35; Dozen, $ .50; 100, $3.75.

SCARLET SAGE

6 for $ .35; Dozen, $ .50; 100, $3.75.

FIELD GROWN PLANTS

The following ready May 25th:

CABBAGE

Succession **Copenhagen Market** **Surehead**
Flat Dutch **Danish Ballhead** **Stonehead**

Doz., $ .10; 3 Doz., $ .25; 100, $ .45; 500, $1.00; 1,000, $1.50; 5,000, $6.80.

TOMATO

Early 4th of July, Chalks Jewel, Bonnie Best, Liv. Stone, Ponderosa.

Doz., $ .10; 4 Doz., $ .35; 100, $ .55; 500, $2.25; 1,000, $3.50; 5,000, $14.85.

SNOWBALL CAULIFLOWER

Doz., $ .15; 2 Doz., $ .25; 100, $ .50; 500, $1.85; 1,000, $2.85; 5,000, $12.75.

CELERY

The following ready June 25th:

Golden Self Bleaching (From French Seed)

Doz., $ .10; 4 Doz., $ .35; 100, $ .55; 500, $1.85; 1,000, $2.85; 5,000, $12.75.

White Plume, Giant Pascal, Winter Queen

Doz., $ .10; 3 Doz., $ .25; 100, $ .45; 500, $1.25; 1,000, $2.00.

Apple Trees

Prices of Apple Trees:

	Each	10	100
First-class, 5 to 6 feet	$0.15	$1.35	$12.00
First-class, 4 to 5 feet	.14	1.25	10.00

Stayman's Winesap. Fruit medium large; skin green and yellow almost hidden by dark red stripes. Flesh yellow, firm; quality unexcelled. November to April.

Mammoth Black Twig. (Paragon) One of the very best winter Apples that we grow. Extra large in size; skin smooth, yellowish covered with deep red. Flesh tender, tinged with yellow, crisp, sub-acid, aromatic, of excellent quality in every respect, and will keep in fine condition until summer apples come.

Ben Davis. Succeeds wherever apples are grown. Good keeper. Large, round, yellow with red stripes. Flesh white, juicy, sub-acid. Season November to March.

York Imperial. Medium, white, shaded with crimson in the sun, juicy, crisp, mild, sub-acid. Tree moderately vigorous and productive. This is a large and beautiful red winter apple, originating in Pennsylvania, where it is a great success. Its foliage and fruit are free from scab. Its skin is bright yellow covered with bright red and striped; it is a good shipper, bringing the highest prices. Its bright red sells the fruit. This is the leading variety in Pennsylvania. Very hardy and suitable to any part of the country.

Jonathan. Medium, roundish, yellow, nearly covered with red, fine grained, tender and finely flavored. Tree slender and spreading with light colored shoots. Great apple of the West and Northwestern states. Succeeds in the East also. Most beautiful of apples. Season November to April.

Rome Beauty. This is a hardy, large and handsome apple, almost entirely covered with bright red, of highest quality. December to March. One of the best.

Winesap. Large, roundish, oblong; little yellow ground appearing on the shady side; flesh yellow, firm, crisp, with rich high flavor; quality very good, and highly esteemed wherever grown. Season November to May.

Baldwin Large, roundish, skin deep red; flesh juicy, crisp, sub-acid, good flavor; very vigorous and productive. The best all-round winter apple for New England and Northern states. Splendid keeper. December to March.

Wealthy An American that is becoming very popular on account of its handsome appearance and early fruiting. Hardy and productive. Fruit large size, roundish, skin smooth, splashed with dark red; flesh white, tender, juicy, sub-acid. November to January.

Yellow Transparent. If you want the best and the most productive summer apple, plant Yellow Transparent. It succeeds well North and West. It will bear fruit in the nursery row on trees two years old. It's a strong upright grower and a great bearer.

McIntosh. Medium size, nearly covered with a bright red; flesh yellowish, tender, juicy; sub-acid. October to February.

Northery Spy. Large, bright, light red and yellow. Flesh juicy, rich crisp, tender, aromatic, of good flavor. Tree strong grower. November to March.

Winter Banana. Size large, golden yellow, and beautifully shaded with bright crimson red. Flesh lemon yellow, fine grained, sub-acid, rich, aromatic flavor. Season November to January.

Peach Trees

Prices of Peach Trees.	Each	10	100	1000
First-class, 4 to 5 feet	$ .15	$1.30	$8.00	$70.00

Elberta. Mid-season. A valuable large peach of good quality; fruit large, yellow with red cheek; juicy and extremely high flavored; flesh yellow; freestone. The leading market variety. Ripens here about the middle of August.

Carmen. A very hardy peach, ripening here about the middle of July; skin pale yellow, with blush on sunny side; flesh white, tender, sweet and melting. Ships well. The best early market peach.

Chair's Choice. Begins to ripen here about the first of September. Large in size; flesh firm of the sweetest and richest grape flavor; color yellow. Freestone.

Belle of Georgia. Ripens here the first to fifteenth of August. Fruit is large, white with red cheek, flesh white, firm of excellent flavor. Tree a rapid grower and very productive. One of the very best market sorts. Freestone.

Hiley. This is a sedling of Belle of Georgia and is one of the best Chinease type, which are our most hardy peaches today; ripens about one week before the Belle of Georgia. A large creamy white peach with rich blush on sunny side; a long keeper and a fine shipper. A perfect freestone.

White Heath Cling. Ripens from September 10th to 15th. This is an old variety of cling peach and has never been excelled by any other of its class. Fruit extra large and roundish; flesh white and exceedingly juicy. It is a favorite with all housewives for caning purposes.

Greensboro. Ripens here from June 25th to July 10th. Extra large and our earliest peach to ripen. Large in size; white in color with a red cheek. Flesh rich and melting; very juicy; tree a strong grower. Anyone who has a yard or garden should set a few trees of this wonderful peach.

Saratoga. A fine late, large, yellow clingstone. If you want a yellow clingstone for canning or other purposes, this is the one.

Champion. An extremely good, early peach. Skin creamy white with red cheek; a perfect freestone, which is a rare thing among early peaches; very hardy, regular bearer.

Pear Trees

	Each	10	100
First-class, 5 to 6 feet	$0.25	$2.00	$17.50

Bartlett. Large size, often with a beautiful blush next the sun; but, it is very juicy and high flavored. Tree a strong grower, bearing early and abundantly; very popular. Last of August first of September.

Kieffer. Large, rich golden, slightly coarse, juicy, with a pronounced quince flavor. Its freedom from blight, early bearing, wonderful productiveness, exceedingly vigorous growth, and handsome appearance all indicate that it has come to stay. Properly picked and cared for it is a good pear to eat out of the hand and for canning purposes it has no superior. October to November.

Make your orchard produce an income, while you are waiting for the trees to bear, by planting Strawberries between the young trees.

Raspberries

St. Regis. Undoubtedly the best Red Raspberry grown. It succeeds upon all soils, and the canes are absolutely hardy in all sections. Gives a crop of fruit the year planted and two crops a year thereafter. In size, quantity and quality to say nothing of its fall-bearing qualities, it is ahead of anything as a spring bearing variety. About the middle of August it commences to set fruit on the young canes, and bears continuously from then until frost. The berries are large, beautiful and attractive. If you have failed with every other variety of Raspberry, either north or south, east or west, plant St. Regis and succeed. Whether grown for home use or market you cannot afford to ignore this, the most wonderful of all Raspberries.

Plum Farmer. A great favorite for both home and market use throughout the country. The fruit is of good size, often measuring one-half inch in diameter. The Plum Farmer is considered the best Black Raspberry.

Cuthbert. A large, productive and attractive Red Raspberry that has given good results for home and market use. Very vigorous grower and possesses vitality necessary for a popular variety. It yields bountifully, is easily picked and brings good prices.

Prices of the above Raspberries: 25 for 65c, 100 for $1.75, 1000 for $12.00.

Currants

Fay's Prolific. For many years Fay's has held the same place among Currants that Concord has among Grapes—that the most extensively planted of any on the list. Productive, large and a good shipper. The leading market variety.

Red Cross. A large and productive variety, and the best mid-season variety on the market. The masses of fruit are so dense as to hide the naked canes from view, and the fruit has a mild, pleasant flavor.

Price of above varieties of Currants, Bearing size: 10c each, 75c for 10; $5.00 for 100.

Grape Vines

Caco. A cross of the Catawba and Concord, possessing the merits of both. Medium to large, nearly round; a little earlier than Concord; skin thin but tough; vine extremely vigorous, a strong grower and hardy. A heavy yielder. Try it.

Strong, transplanted Caco vines, Bearing size, 35c each.

Concord. The most extensively planted and generally successful grape in America. Black, bunch and berry large, fair quality, medium early, vine a rank grower, very healthy, hardy and productive.

Moore's Early. Black. Bunch and berry large, vine exceedingly hardy. Its earliness makes it desirable for an early market and particularly adapts itself to the northern portions of the United States; also a good one for the South.

Niagara. Occupies the same position among the white varieties as Concord among the black; the leading profitable market sort. Bunch and berries large, greenish white changing to pale yellow when fully ripe. Skin thin but tough.

Any of above varieties except Caco, Bearing size, 10c each 75c for 10, $6.50 for 100.

We want that trial order—No matter how small or large

Gooseberries

Houghton. Pale red, medium sized berries of good quality. Vigorous but slender grower, healthy and very productive.

Josselyn. A vigorous, upright growing bush, healthy and productive. Fruit is light red and about the size of the Downing.

Price of above varieties of Gooseberries, Bearing size, 10c each, 75 c for 10, $6.00for 100.

Gladioli

I have a nice collection of these beautiful summer flowering bulbs at **35 cents per dozen postpaid.**

Dahlia

I offer these in an assortment of different colors, varieties, etc., mixed at **75 cents per dozen postpaid.**

California Privet

A vigorous-growing hedge, of fine habit, thick, glossy, nearly evergreen leaves. Of all ornamental hedge-plants this is the most highly prized. If cut to the ground one or two years after planting it makes a very thick hedge right from the bottom sending up many strong shoots. The leaves are a rich green, and will remain on the plants nearly almost all winter, and if they are a little sheltered they will keep green almost all winter. This is especially the case if the hedge has attained some age and has frequently been trimmed. Though it is a very strong grower, it can be kept to a low size by frequent trimming. Where a close, compact hedge is required I recommend California Privet. Should be planted about eight to ten inches apart to give best results. Prices of California Privet:

	100	250	500	1000
1 year 6 to 12 inches	$1.00	$2.25	$4.00	$ 7.50
1 year 12 to 18 inches	1.50	3.00	5.50	10.00
1 year 18 to 24 inches	2.00	3.75	7.00	12.50
2 year 2 to 3 feet	2.50	5.50	10.00	20.00

Barberry Thunbergii

Spring and Summer leaves are green and attractive; in Autumn it is one of the most effective plants; after most other delicious shrubs are bare, its small oval leaves then assume rich crimson colors, the slender branches droop with their of bright red berries which hang on till late Winter. One of the best to plant for ornamental hedges, in fact no plant surpasses the Berberis for low hedges.

Instructions for planting same as for California Privet hedge.

	10	100	250	500	1000
2 year strong 12 to 18 inches	$ .50	$2.50	$5.50	$10.00	$18.00
2 year strong 18 to 24 inches	.80	4.00	9.00	15.00	28.00

TINGLE'S PLANTS PLEASE AND BEAR BIG CROPS. TRY THEM

Asparagus

This is the first and most delicious vegetable we get out of the garden in the spring, appreciated by all, yet many of the smaller vegetable-gardens are without a bed of it. It is generally thought that it requires too much space for its growing, but a plot 5 feet wide by 30 feet long is large enough to get a generous supply for the ordinary-sized family. One hundred roots will plant this space.

Prices of Asparagus roots:

1 year old roots, 50 cents for 100, $2.50 for 1000.
2 year old roots, 60 cents for 100, $3.00 for 1000.

Palmetto. Early, large and comparatively free from rust; makes a heavy yield. Altogether this variety is very popular and is regarded by most growers as one of the most profitable of the market sorts.

Giant Argenteuil. This variety is largely grown in France, and has become adapted to our soil and climate, is noted for its earliness, productiveness and immense size of stalks. Remarkably healthy.

Barr's Mammoth. Early and very large; makes a rapid growth. A general favorite.

Conover's Collossal. Large, rapid grower, productive and of very fine quality.

90 BUSHELS OF SHELLED CORN PER ACRE

The Wonderful Maryland Twin Corn did this this year on the farm of J.W. Hall, Somerset County, Maryland. You should plant some of this corn this year. At the price of corn now, do not let the cost of the seed keep you from geting the best results from an acre that you can. It does not take much of an increase in the yield to pay for the best seed that you can get.

The foliage is abundant, leaves thick, broad and long; makes more fodder by one third, of the finest quality than any other variety of corn I have yet seen. Unexcelled for ensilage. It grows from 10 to 12 feet high and has from 2 to 4 ears on a single stalk. Ears from 7 to 11 inches long. The kernels are a nice even size, medium hard, good keeper, an excellent corn for milling, the meal from this corn being of the very finest quality and unexcelled for making corn flakes of any kind. The corn shells much better than any other variety of corn. The ears have 12 to 18 rows of deep kernels around a small white cob, compact and solid, very little air space, grains filled well out to the end of the cob. Grows well on light or heavy soil. Stalks strong and will mature in 110 to 115 days.

Price $1.25 per peck, $4.00 per bushel, sacks free.

Cow Peas

Of all the forage crops the cowpea has first place, which it richly deserves. They are excellent for Hay or grazing and one of the best summer catch crops for renovating and improving the soil. Peas sweeten and mellow up new, sour land and will make a good growth on any kind of soil.

Cowpeas are becoming very popular as our greatest soil improver. To plant plenty of cowpeas is one source that will greatly reduce both our hay and fertilizer bills. There is nothing that will build up our land quicker than a good crop or two of cowpeas. Plant them everywhere, as it is the cheapest fertilizer you can buy and made by nature's own hand.

Prices quoted on application.

Some Planting Suggestions

All varieties of the Strawberry give the greatest yield and the largest berries when grown in rich soil; hence no pains should be spared in preparing the bed carefully before planting, by digging or plowing deeply and turning under a liberal application of well-rotted manure. Pulverize the surface soil thoroughly with harrow and rake, and if a top-dressing of ground bone can be applied, it will be found a great benefit at fruiting time. Select a location where the soil is moist and deep if possible—moist and yet where water does not stand near or upon the surface. In such a soil well-enriched, Strawberries delight and give marvelous results. They will, however, succeed upon soil if well manured. Strawberries do not succeed when planted in shady locations; hence in selecting a plot for them be careful to avoid places that are shaded by trees.

For hill culture in the family garden, set plants in rows two feet apart and the plants fifteen inches apart in the rows; or if to be worked by horse and cultivator, have the rows three feet and the plants one foot apart in the row. In either case, cut off the runners as they appear. If to be grown in matted rows, plant in rows three and one-half or four feet apart and the plants fifteen inches apart in the rows, permitting the runners to set in the row so as to be about six inches apart each way. The after-culture consists in keeping the soil mellow and free from weeds by frequent hoeing and cultivation. If you live in the North, where you are subject to severe freezes, I would advise you to mulch your plants. At the approach of winter (as soon as the ground is frozen sufficiently to support the weight of horse and cart) cover the entire bed with straw or other loose light material. Light strawy manure is excellent for this purpose, and the soluble portion leaches into the soil and affords nourishment to the plants, while the fibrous portion remains upon the surface as a mulch. Evergreen branches are very useful for holding the mulch in place and are of themselves a protection. When the plants start growth in spring, rake the mulch from off the plants sufficiently to permit them to push through it, and leave it on the surface about the plants to protect the fruit and keep it clean and also keep the soil moist and cool. An application of unleached wood-ashes or muriate of potash along the rows very early in spring, just before a rainfall, will be found to increase the size, beauty and flavor of the berries.

Strawberry Plants for Fall Planting

My sales of Strawberry plants in the fall are rapidly increasing. Most plant growers refuse to dig any plants before the first of November, because for every plant big enough to sell others are destroyed that would be good ones later. Our soil and conditions being especially adapted for an early growth, we usually begin shipping about October 1st and sometimes a little earlier. If you are interested in fall-planting you should have a copy of my fall price-list, which will be ready to mail about September 1st, each year.

Testing New Varieties

By all means have a small plot of ground for the purpose of testing the new varieties. Each season get a few of each of the new kinds that appeal to you. By doing this you are not investing a lot of your money in something that may not suit your soil or locality, while among the new ones you are likely to find some better than you now have. Many large growers say they could not afford to be without their testing plot. This is not an expense as you will get enough berries from it the first season to pay the expenses. Make a start this season.

Why Tingle's Plants Succeed

Our Strawberry plants are taken from young beds, fresh dug before shipment, plants are well-rooted and not dug from old or run-down beds. These plants are from beds that have never borne a crop and will bring you best results. In the fall our ground is plowed to a good depth and then we broadcast stable manure on top of the plowed ground, then let it stay this way until spring, we then thoroughly pulverize the soil, and at the same time mixing the manure with the soil by harrowing. After the plants are set and begin to make runners we fertilize them with commercial fertilizers, this is repeated late in the summer. The deep plowing with an abundance of plant-food given the plants causes them to make a splendid growth with lots of long fibrous roots. You need these kind of plants and it will pay you to get them. Which kind of plants had you rather have, plants that have been carefully grown and that are full of life, which will produce big crops or plants that have not been fertilized—plants that have been grown only for quantity without a thought of quality? **If you want the kind that will make you a successful berry grower and that will produce you the largest and best crops, plant Tingle's full of life plants—they succeed.**

"Modern Strawberry Growing"

A new book on the Strawberry by **Albert E. Wilkinson**, Instructor of Horticulture and in charge of extension work, Cornell University.

The Only Strawberry Manual in 25 Years

This is the most complete treatise on the Strawberry that I have ever seen, and I recommend it to every grower of Strawberries.

Modern Methods of Growing, Modern Methods of Packing,
Modern Methods of Selling.
